

# Oracle9i Application Server (Oracle9iAS)

## Summary of Editions and Options (Release 2) April 2003

Features / Capabilities	Java Edition	Standard Edition	Enterprise Edition	Options
<b>Oracle9iAS Containers for J2EE</b> <i>The industry's fastest, J2EE 1.3 Compliant™ Java environment. Support for Web Services including UDDI, SOAP and WSDL. Fast Start Fault Recovery Architecture ensures high availability. Includes cluster support for JSPs, Servlets and EJBs, and J2EE-based Security Framework.</i>	✓	✓	✓	
<b>Oracle HTTP Server</b> <i>100% Apache-based. Includes plug-ins for Netscape and Microsoft IIS Web servers, Perl interpreter, and Dynamic Monitoring Service (DMS) support. Includes extensive support for Apache modular architecture, and Web server clusters for high availability.</i>	✓	✓	✓	
<b>Oracle9i JDeveloper<sup>1</sup></b> <i>J2EE and Web Services IDE offering built-in UML modeling and J2EE design pattern framework, the industry's fastest debugger, sophisticated profiling and code coach optimization tools, one-click deployment to Oracle9iAS, and integrated software configuration management.</i>	✓	✓	✓	
<b>Oracle9iAS TopLink</b> <i>An advanced Java persistence architecture for rapid development and deployment of enterprise Java applications that access relational databases.</i>	✓	✓	✓	
<b>Oracle Enterprise Manager</b> <i>Extensible, browser-based management and monitoring environment for application server nodes and J2EE components. Ability to easily install, configure and manage clusters.</i>	✓	✓	✓	
<b>Oracle9iAS Portal</b> <i>Browser-based environment for building and deploying personalized e-business portals. Includes single sign-on feature for secure access to portal.</i>		✓	✓	
<b>Oracle9iAS Single Sign-On</b> <i>Provides enterprise-wide single sign-on to Web-based, legacy and J2EE applications as well as Web services.</i>		✓	✓	
<b>Oracle Content Management SDK</b> <i>Present documents and media as files and folders that users can access through Windows, the web (HTTP), e-mail, and FTP.</i>		✓	✓	
<b>Oracle9iAS Web Cache</b> <i>Built-in Web caching to turbo-charge dynamic Web sites and Internet applications. Includes support for cache clusters for high availability.</i>			✓	
<b>Oracle9iAS Integration</b> <i>Standards-based platform and tool for integrating users, applications, Web services and partners. A suite of pre-built packaged application adapters is also available (licensed separately).</i>			✓	
<b>Oracle Internet Directory</b> <i>Manage user identities, roles, authorization and authentication credentials for LDAP-enabled applications in a single, centralized repository.</i>			✓	
<b>Oracle9iAS Discoverer</b> <i>Create, modify, and execute ad-hoc business intelligence reports to perform sophisticated analysis using any standard Web browser.</i>			✓	
<b>Oracle9iAS Reports Services</b> <i>Enables browser-based, high fidelity enterprise reporting. Access any data, publish it in any format, anywhere.</i>			✓	
<b>Oracle9iAS Forms Services</b> <i>Optimized environment for deploying Oracle Forms Developer applications to the Internet.</i>			✓	
<b>Oracle9iAS Personalization<sup>2</sup></b> <i>Using data mining technology, enables 1:1 marketing by dynamically serving real-time, personalized recommendations to both registered customers and anonymous visitors.</i>				✓
<b>Oracle9iAS Wireless<sup>2</sup></b> <i>Make information in any database or application available to any portable device connected to the Internet.</i>				✓

<sup>1</sup> Oracle9iAS includes 5 Developer licenses of Oracle9i JDeveloper per licensed Processor.

<sup>2</sup> Oracle9iAS Personalization and Oracle9iAS Wireless are Options to Oracle9i Application Server Enterprise Edition.
